SKILLS

- Information Architecture
- Prototyping
- Wireframing
- HTML
- CSS

TOOLS

- Figma
- Canva
- Github
- Adobe Photoshop

LANGUAGE

- English
- Tamil

PROFILE

Creative UI/UX Designer with a Computer Science background. Bridges the gap between complex user needs and functional code through intuitive wireframes, interactive prototypes, and front-end development skills.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Computer Science (B.E.) student specializing in UI/UX and front-end development. Experienced in leading end-to-end mobile app prototyping—from user research and wireframing to usability testing. Proficient in Figma, HTML, CSS, and JavaScript.

PROJECTS

Bike Parking Mobile App

1. User Research & Design: Conducted user research to address urban commuter pain points, creating targeted user personas and designing high-fidelity Figma wireframes for a seamless 3-step parking booking flow.
2. Prototyping: Built interactive, click-through prototypes featuring live map interfaces and streamlined QR code check-in screens to simulate an end-to-end user experience.

To-Do List Web Application

- UI/UX Design: Designed a minimalist, clutter-free user interface focused entirely on reducing cognitive load and maximizing task management efficiency
- Features & Implementation: Built dynamic features using clean front-end code to allow users to smoothly add, edit, transition, and track daily tasks.
